# HANDS-ON TRAINING

 TUESDAY - JUNE 12, 2018  7AM - 4PM

 6350 HOWDY WELLS AVE \ LAS VEGAS, NV

[RSVP ONLINE](#)

## TRAVERSE WITH SCANS AND LINEWORK

Meant for intermediate to advanced total station users. We will undergo an in-depth view of Leica's Multistation's use on a survey projects. Will complete a multi-leg traverse and scan relevant areas for volume calculations and other onboard calculations. Will include a discussion on benefits of using a total station versus other positioning options on a survey site.

## ROADS

The road package has been re-vamped for Leica's Captivate software. You will get a complete walk-through of the new features for laying out a road. You will also get a demonstration how the new GS18 T increases road tasks by 30% to 40% with its new tilt capabilities.

## PIPELINE

The session will focus on the Leica Captivate Pipeline application. Attendees will walk through various scenarios focusing on the major points of pipeline as-built fieldwork from tallying to a deliverable. You will complete a tally and an as-built of the joints above and in ditch. Followed by a discussion of the GS18 T in regards to this application.

## GS18 T

This session will outline all the advantages of Leica Geosystems' patented tilt sensor technology, and how it effects your performance in the field. You will receive a demonstration of tasks that are not possible with conventional GNSS antennas. Followed by an Q&A session.
